Thank you for purchasing the **GOgroove AirBand** wireless Bluetooth stereo headset. The wireless Bluetooth capability enables you to listen to music anytime without getting tangled up in the wires of a regular headset. The lightweight, flexible design and pivoting ear cushions allow for optimum comfort so you can enjoy your favorite music at home or on-the-go. With no wires to hold you back, where will you listen to your music?

Quick Start

Make sure the **AirBand** is charged. Turn on Bluetooth function of your MP3 player or mobile phone. Press and hold the Power button on the **AirBand** for 5-7 seconds to enter pairing mode. The LED indicator will blink red and blue rapidly. On your MP3 player or mobile phone, search for Bluetooth devices and select "GG-AIR". Then, connect with the headset and you're ready to start listening to music and making phone calls.

What's in the Box

a - AirBand wireless Bluetooth stereo headset
b - USB charging cable
c - AC power adapter

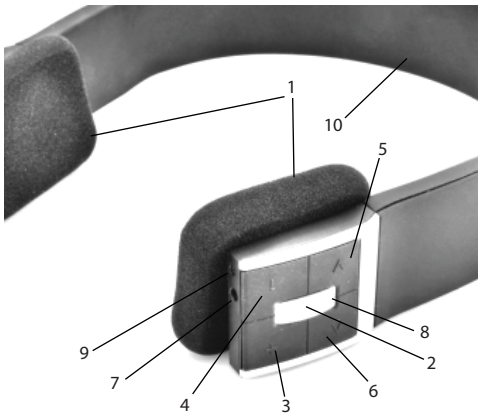
4 - Volume Down (-)
5 - Skip Back
6 - Skip Forward
7 - USB Charging port
8 - LED Indicator
9 - Microphone
10 - Adjustable Headband



Operating Instructions:

Charging the AirBand

Charging by USB (computer/Laptop)

Plug your *(b) USB charging cable* into the *(3) USB charging port* on the headset. Plug the other end of the *(b) USB charging cable* into the USB port on your computer. *(4) The LED indicator* on the **AirBand** will glow red when the device is charging.

Charging by AC Power Adapter

Plug your *(b) USB charging cable* into the *(3) USB charging port* on the headset. Plug the other end of the *(b) USB charging cable* into the *(c) AC power adapter.* Then, plug the *(c) AC power adapter* into an AC wall outlet. The *(4) LED indicator* on the **AirBand** will glow red when the device is charging.

Switching the AirBand on/off

Switching On

Press and hold the *(1) power button* for 3-5 seconds. You will hear a beep and the *(4) LED indicator* will blink blue. This indicates that the device is powered on.

Switching Off

Press and hold the *(1) power button* for 3-5 seconds. You will hear a beep and the *(4) LED indicator* will blink red. This indicates that the device is powering off.
- The headset will switch off automatically in order to save power if no device is connected within 5 minutes.

Pairing the AirBand with Bluetooth devices

How to enter Pairing Mode

Make sure the headset is off. Press and hold the *(1) power button* for 5-7 seconds. Release when you see the *(4) LED indicator* alternate between red and blue.

Pairing the headset with a Bluetooth mobile phone
Please make sure that your mobile phone has Bluetooth capability. Keep the headset and mobile phone within 1 meter when pairing. Enter pairing mode on the headset (Please refer to "How to enter pairing mode"). Switch on the Bluetooth function of your mobile phone and search for Bluetooth devices. After the phone completes its search, select "GG-AIR" in the Bluetooth device list. If prompted, type "0000" as the password or PIN number and press "Yes" or "Confirm". After successfully pairing, select "GG-AIR" in the Bluetooth device list and press "Connect". Once the headset is successfully paired and connected, the *(4) LED indicator* will blink blue twice every 4 seconds.
- Specific pairing procedures may vary with different mobile phones. Please refer to your mobile phone manual for further information.

Reconnecting with Bluetooth device

Connecting Automatically: The headset will connect with the last paired device automatically when switching it on.

Connecting Manually: When the headset is in Standby Mode, press the *(1) power button* and the headset will send a connecting request to the last paired device.

Making a Call with the AirBand

Standby Mode

-The following functions can be performed while **AirBand** *is in Standby Mode. Standby Mode occurs when the user is connected to a device, but is not listening to music, or making a call.*

Voice Dial: Press and hold the *(1) power button* for 2 seconds. Release when you hear the short tone.

-Voice Dial is a function that you can use in order to dial a number vocally or call someone in your contact list, all without picking up the phone.

Redial Last Number: Press the *(1) power button* twice. You'll hear a short tone.

Ringing: (Incoming Call)

Answer a Call: Press the *(1) power button*. You'll hear a short tone.

Reject a Call: Press and hold the *(1) power button* for 2 seconds. Release when you hear a short tone.

Conversation Mode

Volume Up: Roll the *(1) volume dial* toward (+) and hold until the volume is loud enough.

Volume Down: Roll the *(1) volume dial* toward (-) and hold until the volume is low enough.

End a Call: Press the *(1) power button*. You'll hear a short tone.

Switch Conversation between the Headset and Mobile Phone: Press and hold the *(1) power button* for 2 seconds. Release when you hear a short tone.

Making a Call with the Headset (cont'd)

Microphone Mute: Press the *(2) Play/Pause button*. You'll hear a short tone every 6 seconds.
Cancel Mute: Press the *(2) Play/Pause button.*
**Not all mobile phones support all the functions listed above. Please refer to your mobile phone User Manual.*
**When the volume is adjusted to max or min, you will hear an indication tone.*

Playing Music

Volume Up: Press the *(1) Volume up (+) button* on the headset or hold until the volume is loud enough.
Volume Down: Press the *(1) Volume down (-) button* on the headset or hold until the volume is low enough.
Pause: Press the *(2) Power button.*
Play: Press the *(2) Power button.*
Skip to Previous Song: Press the *(2) Skip back* ◀◀ *button*.
Skip to Next Song: Press the *(2) Skip forward* ▶▶ *button*.
**When the volume is adjusted to max or min, you will hear an indication tone.*

LED Indicator

**The (4) LED indicator glows blue or red and has different blinking patterns to indicate the action the headset is performing.*

Charging

When charging, you'll see the *(4) LED indicator* illuminate red.
When charging is complete, the *(4) LED indicator* will turn off.

LED Indicator (cont'd)

Pairing with Bluetooth Devices:

Pairing Mode: *(4) LED indicator* alternates between red and blue.
Standby Mode *(Not connected with Bluetooth device)***:** *(4) LED indicator* blinks blue twice every 2 seconds.
Standby Mode *(Connected with the Bluetooth device)***:** *(4) LED indicator* blinks blue twice every 4 seconds.
Ringing: *(4) LED indicator* blinks blue continuously.
Conversation Mode: *(4) LED indicator* blinks blue every 2 seconds.
Low Power: *(4) LED indicator* blinks red twice every 30 seconds.

Indication Tone

Your* **AirBand *emits a beep or tone sound to indicate different device statuses.*

Conversation Mode and Microphone Mute: *Y*ou'll hear 2 tones every 3 seconds.
Low Power: You'll hear 3 tones every 30 seconds

Troubleshooting

1. The *(4) LED indicator* is glowing red

- Battery power is low and the device needs to be charged.

2. The *(4) LED indicator* isn't glowing when charging

- Please make sure the *(b) USB charging cable* is connected properly with the headset.
- If you haven't used the headset in a long time, the battery may be too low for the *(4) LED indicator* to light up. You'll need to charge the headset for 30 minutes, then you'll see the *(4) LED indicator* glow red.

3. The headset isn't pairing with my mobile phone

- Is Bluetooth enabled on your mobile phone? Did you successfully switch the **AirBand** to pairing mode?
  You'll know the* **AirBand *is in Pairing Mode when the (4) LED indicator flashes blue and red.*
- Try to pair the devices again. Please switch off headset and follow the instructions above (Please refer to "How to enter pairing mode" and "Pairing the head set with Bluetooth mobile phone"). Make sure you push straight down on the button.

4. The music is playing out of the speaker on my phone instead of the headset

- For some mobile phones, when they are playing music, the music will be transmitted through the speaker of the mobile phone. You may have to choose "transmit the sound through Bluetooth" in the settings and select "GG-AIR" in the device list. The music will then be transmitted through the headset.

5. I'm trying to make a phone call, but can't hear the other person's voice

- Please make sure the headset has been switched on.
- Make sure the volume is not too low or muted.
- Make sure that the headset is properly connected to the Bluetooth device.
- Make sure the distance between the headset and the mobile phone is in the working range.

6. During a phone call, the other person's voice is not clear

- Make sure that you have a good signal on your mobile phone.
- Make sure the headset is in the available range of this product.

Cautions

- Keep in a safe place free from dust, liquid, and extreme temperatures.
- Do not attempt to take apart the product.
- Try to avoid dropping on the floor or hitting against hard surfaces.
- Do not use chemicals to clean the product.
- Keep out of the reach of small children.
